Pro Tips for Better Prompts

Introduction

Most people are just scratching the surface of what AI tools can do. The truth is, great results start with great prompts.

This playbook gives you real-world examples and plug-and-play templates to help you get better, faster results—without overthinking.

Ask anything

Prompting 101: A Quick Framework

A great prompt gives AI the right context, intent, and format.

Here's a strong structure:

"I'm a [your role or context]. I need help with [what you want]. Here's the context/input: [insert]. Please make the output [format, tone, or goal]."

Example

So-so: "Summarize this meeting."

Better: "I'm an HR leader recapping a leadership meeting. Here's the transcript: [insert]. Summarize it in bullet points, focusing on action items, in a tone I can send by email."

Refine and iterate until it works. The more you share, the better the results.

From Good to Great: Prompt Makeovers

Generate...

Even decent prompts can fall flat if they're too vague or make the AI guess what you really want. In this section, we give real-world examples of some "meh" prompts, and show how to upgrade them into clear, specific asks that get you useful, human-sounding results faster.

IT Ticket Summary

Bad: "Summarize this ticket."

Good: "I'm an IT helpdesk tech, and I need a summary I can send to a non-technical exec. Here's the ticket: [paste]. Summarize the issue, root cause, and fix in clear, plain language."

Cybersecurity Alert

Bad: "Write a cybersecurity alert."

Good: "I'm in IT security. I need to draft a warning email about a phishing scam spoofing Microsoft logins. Include what to watch for, how to report it, and keep the tone calm but serious. Add a strong subject line. For reference, here's an email I wrote before so you can put it in the same tone [paste email]."

Internal Policy Writing

Bad: “Write a remote work policy.”

Good: “I’m in HR, drafting a remote work policy for a mid-size tech company. Include sections on eligibility, expectations, security, and check-ins. Make it clear, employee-friendly, and ready to share.”

Social Media Post

Bad: “Write a post about our new hire.”

Good: “I’m a marketing manager writing a LinkedIn post to welcome our new Director of Security. Keep it upbeat and personal. Mention a fun fact and tag them at the end. Under 150 words. Here’s a sample post with the most engagement, keep it in the same tone [paste post].”

Prompts for Leaders

Decision Support

Bad: “Help me decide.”

Good: “I’m a business owner debating in-house vs. outsourced IT. Give me a clear comparison of cost, flexibility, and risk. Add a recommendation based on common SMB needs. Ask me whatever questions you need to get clarity on our business.”

Leadership Message

Bad: “Write a message to my team.”

Good: “I’m a CEO, writing to my team after a major client win. I want to celebrate the effort, express gratitude, and build momentum. Keep it motivating and concise. Ask me what you need to get the details right.”

Budget Justification

Bad: “Justify the IT budget.”

Good: “I’m preparing to justify a 15% increase in IT spend. Outline ROI, risk reduction, and business impact. The audience is our board—keep it high-level and strategic.”

Market Trend Summary

Bad: “Summarize tech trends.”

Good: “I’m writing a Q3 market update for SMB execs. Focus on AI, cybersecurity, and IT hiring. Use plain language and cite recent stats.”

Vision Statement

Bad: “Write a vision statement.”

Good: “I’m a founder crafting a vision statement for a growing IT services firm. Help me write something bold, inspiring, and memorable—for both our team and clients.”

For IT/Cyber/Ops Pros

- “I’m a technical writer summarizing a support ticket.
Make it clear for a non-technical client—include issue, fix, and next steps.”
- “I’m a cybersecurity advisor comparing MFA tools.
Give me a quick comparison of 3 options (features, pricing, usability). Keep it client-facing.”
- “I’m editing a long internal email.
Help me make it shorter, clearer, and easier to act on. Here’s the draft: [paste].”
- “I’m prepping a report for execs.
Summarize the key risks, findings, and takeaways in under 250 words.”

For Business Leaders

- “I’m planning a 45-minute leadership meeting.
Create an agenda with time blocks and owners. Topics: [insert].”
- “I’m the COO, announcing a department restructure.
Help me write a message that’s clear, empathetic, and forward-looking.”
- “I’m working on a SWOT for a new service offering.
Help me brainstorm Strengths, Weaknesses, Opportunities, and Threats.”

Pro Tips for Better Prompts

Tell it who you are

- Say what you want, and for whom
- Ask for the output format you need (table, summary, checklist, email)
- Don't be afraid to over-explain
- Iterate: tweak, rerun, refine

Want to make your own templates? Start from the sentence:

“I’m a [your role]. I need help with [your task]. Please make it [goal or format].”
